**DETAILED ACTION**

1. Claims 44-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lemelson.

Carrier head 18 can be moved by Z-axis drive 39 and X-Y axes drives 17 and 19. Base element 20 is moved by drives VM1 and VM2 along a arbitrary path. The ground or floor is the base unit that supports work W. The type of work W being handled is immaterial to the operation of the system. With regard to claims 46, 47, 58 and 59, the combination of drives 17, 19 and 39 enable movements along other directions. With regard to claims 49, 51, 52, 61, 63 and 64, the number of articles has not been proven to be critical to the operation of the system. With regard to claims 50-52 and 62-64, the number of work stations has not been proven to be critical to the operation of the system. With regard to claims 53, 54, 65 and 66, the work W may be carried by carrier head 18 to another work location thereby moving the work station.

2. Thomason and Izumi et al are pertinent.
